TECHNICAL SKILLS

LANGUAGES

- Java
- Python
- SQL
- C++

BACKEND

- Spring Boot
- Spring Security
- JWT
- REST APIs

DATABASES

- PostgreSQL
- MySQL
- MongoDB

CLOUD & DEVOPS

- Azure (Data Factory • ADLS • Event Hubs • Databricks)
- AWS (basic)

TOOLS

- Git
- JPA/Hibernate
- Postman
- Maven

EXPERIENCE

SOFTWARE SYSTEMS ENGINEER [Oct 2024 - Present]

Host Organization: Coforge

- Contribute to backend feature development and **production fixes** for Sabre's airline reservation system (**Java**), handling medium-to-high complexity tickets.
- Perform **log-driven debugging**, issue recreation, and **Java based TDS validation scripting** to support root-cause analysis and reliable system fixes.

PROJECTS

SCALABLE ETL FOR FINANCIAL DATA

- Built end-to-end Azure ETL pipeline following **Medallion Architecture** (Bronze-> Silver-> Gold) for batch ingestion, transformation, and **Power BI** reporting.
- Implemented real-time fraud detection using **Azure Event Hubs** and **Databricks** for low-latency ingestion and processing of live financial transactions into Azure SQL and **Power BI** reports for risk management.
- Technologies: **Azure: Data Factory, ADLS, Databricks, Azure SQL, Event Hubs, Power BI.**
- Project Link : [github.com/Parul101shah/BFSI_ETLpipeline](#)

ECOMMERCE SPRINGBOOT APP

- Developing a full-stack e-commerce platform using (**Spring Boot, React, PostgreSQL**) with **JWT authentication** and **RBAC** across customer, seller, and admin roles.
- Designed **paginated REST APIs** with **JPA/Hibernate**; integrating Stripe payments and admin modules for order and inventory management.
- Deploying on **AWS EC2 + S3** with **Docker** containerisation; stateless **JWT** architecture enables horizontal scaling without session state.
- Technologies: **Spring Boot, React, PostgreSQL, Spring Security, JWT, Stripe, AWS, Docker**
- Project Link : [github.com/Parul101shah/Ecommerce_App](#)

CERTIFICATES

COFORGE GET - DATA ENGINEERING [Nov 2024 - Feb 2025] Host Organization: Great Learning

- Completed advanced training in **Python, SQL, MongoDB, Hadoop, Spark, and Azure**, focusing on **data pipeline** development and large-scale data processing.
- Applied **data preprocessing, EDA**, and **cloud-based deployment** workflows for analytics-ready datasets.
